THE 4 ARGUMENTS OF COMFORT

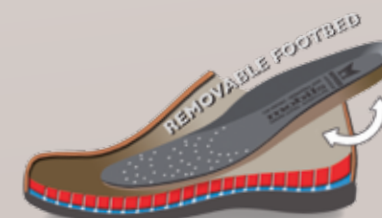

ALLOVER PADDING

One of the characteristics of MOBILS shoes and sandals is their ALLOVER PADDING: soft and comfortable. This amazing padding applied between the lining and the upper leather ensures optimal comfort, softly enveloping your feet and avoiding unnecessary compression.

SOFT-AIR TECHNOLOGY

Thanks to the SOFT-AIR TECHNOLOGY of MOBILS, aching feet are a thing of the past. The SOFT-AIR midsole minimizes the shock resulting from walking. It protects your feet, relieves your joints, cares for your back and promotes a healthy environment inside your shoes.

REMOVABLE FOOTBED

The ANATOMIC REMOVABLE FOOTBED promotes the smooth movement of the foot and reduces the shock resulting from walking. It is the guarantee for a soft and tireless walk from all the styles of the MOBILS collection. You can also replace this footbed with your personal custom orthotics.

COMFORTEMP LINING

The innovative COMFORTEMP lining is a microfiber membrane that regulates temperature. This membrane ensures that the temperature inside MOBILS shoes remains pleasantly fresh at all times. Additionally it maintains a healthy environment for your feet.
